ahead with the operation or not. This document will give you information about the benefits and risks to help you to make an informed decision. If you have any questions that this document does not answer, ask your surgeon or the bealtheat team.

What are the benefits of surgery? The aim is to confirm exactly what the problem and for many people the problem can be treated at the same time. The benefit of keyhole surgery is less pain afterwards and, for some people, a quicker recovery.

Are there any alternatives to surgery? Problems inside your knee can often be diagnosed using a magnetic scan (MRI scan) but you may then need an arthroscopy to treat the problem. Your surgeon will discuss with you having a scan we the extinoscope.

re the arthroscopy. lotherapy and anti-inflammatory painkillers as ibuprofen can sometimes prevent or delay need for an arthroscopy.

hat will happen if I decide not to ave the operation? amage inside your knee does not usually heal thout treatment although screetings your knee

II become less troublesome with time or after a unse of physiotherapy. Ou have a torn cartilage, the tear can sometimes ve out of place and cause your knee to lock. If ur knee does not unlock again, you will need an gent arthroscopy.

## PROCEDURE INFORMATION ARTICLES

- Select from Thieme EIDO library of nearly 400 procedures and send an article to the patient, via SMS or Email.
- The patient can view the article on their phone, tablet or computer.
- The link sent to the patient is unique, allowing their activity to be tracked and related to their digital consent record.

#### HOME CONSENT FORM

- A clinician can send the Home Consent Form to the patient after their consultation.
- The patient reads through the consent statements and gives their initial consent to proceed with the procedure or investigation.
- When the patient comes into hospital for the procedure, the consent form is printed and signed by both patient and clinician.

Indian Medical Association is the only representative, national voluntary organisation of Doctors of Modern Scientific System of Medicine, which looks after the interest of doctors as well as the well being of the community at large. The founding fathers wayback in 1928, while struggling for liberation of the Motherland from British rule simultaneously felt the need of a national organisation of the medical profession. Before that, some members of the profession- a selected few - were members of the British Medical Association, which had opened branches in India to cater to the local needs. These stalwarts, ultimately succeeded in formation of Indian Medical Association and reached an agreement with the British Medical Association that they will have no branch in India, and got mutually affiliated, which relationship continues till today.

Indian Medical Association in the year 1946 helped in organisation of the World body, namely, World Medical Association, and thus became its founder member. As an organisation it has been, and continues to play an important role in its deliberations. It hosted the III World Conference on Medical Education under the joint auspices of W.M.A. and I.M.A. in New Delhi in 1966.

Today, I.M.A. is a well-established organisation with its Headquarters at Delhi and State / Terr. Branches in 34 States and Union Territories. It has over 3,70,000 doctors as its members through more than 1750\* local branches spread all over the country.
